GEOMETRY QUEST · WORLD 3

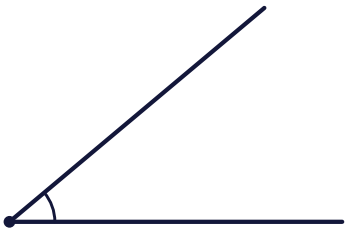
Protractor Skills

ANSWER SHEET · for the grown-up

Answers are shown in green. “Check” means look at the child’s drawing or measuring: allow ±2° or ±2 mm.

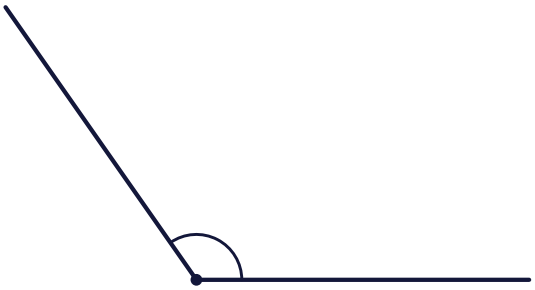
1 Measure each angle with a protractor. Put the centre on the corner and count up from the 0 on one arm. (Drawn to size: print at 100%.)

a)



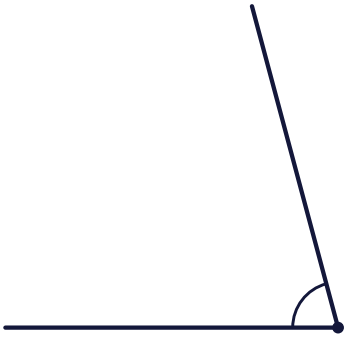
40 °

b)



125 °

c)

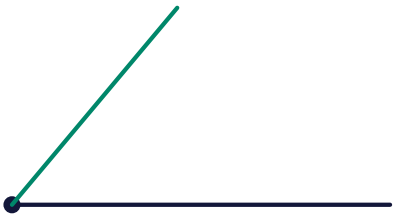


75 °

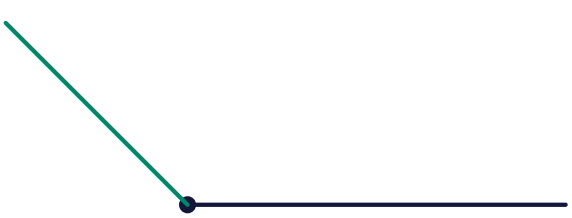
d)

160 °

2 Use your protractor to draw these angles on the lines below. Mark the angle with an arc.



a) 50°



b) 135°

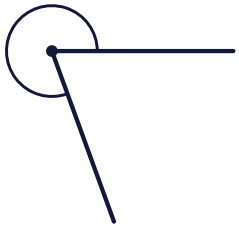
3 This is a reflex angle. Measure it. (Tip: measure the small angle, then take it away from 360°.)



290 °

(small angle 70°, 360 − 70 = 290)

4 Sam measured an angle and wrote 140°. But the angle is clearly smaller than a right angle. What went wrong, and what is the real size?

Read the wrong scale. The angle is 180 − 140 = 40°.
