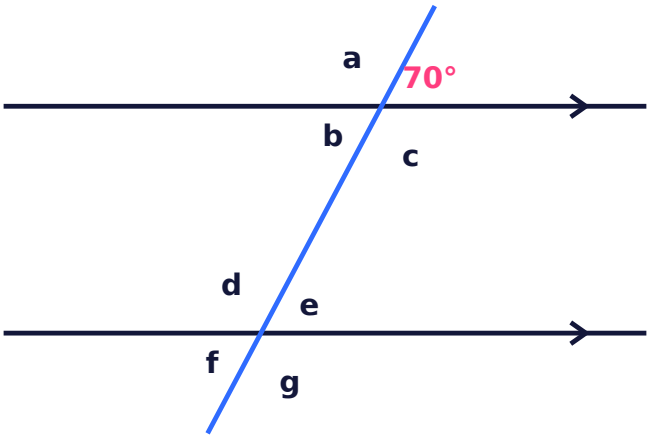
GEOMETRY QUEST · WORLD 9

Parallel Lines

ANSWER SHEET · for the grown-up

Answers are shown in green. “Check” means look at the child’s drawing or measuring: allow ±2° or ±2 mm.

1 The two rails are parallel. One angle is 70°. Find angles a to g. (Not drawn to scale.)



a = 110°
b = 70°
c = 110°
d = 110°
e = 70°
f = 70°
g = 110°

2 Use the diagram. Which kind of angle pair is each one: corresponding (F), alternate (Z) or co-interior (C)?

70° and e — **corresponding (F)**
b and e — **alternate (Z)**
b and d — **co-interior (C)**

3 Two co-interior angles: one is 115°. What is the other?

65 °

4 Parallel hunt: find four pairs of parallel lines at home (think shelves, stairs, window frames).

Any sensible answers.
